Prepare both a summary paragraph and a general description of the resource and its various elements as it exists today.

This row of seventeen two-bay-wide, two-story brick houses with low-pitched gable roofs are typical of the small alley houses built in Baltimore in the 1850s, often along especially narrow secondary alley streets running perpendicularly off the main "alley" street. In many cases, alley houses such as these are still occupied by working class families and many are still covered with the formstone put on in the 1950s or 1960s.

The houses are two stories in height and range in width from a tiny 10' to 14' for an end unit and occupy lots ranging in depth from 47'6" to 58'. 102-114 are the narrowest of the group, two being only 10' wide, the rest 11'3" on lots 58' deep. 116-122 were built as a unit, ranging in width from 10'9" to 11'3" on 50' lots. 124-130 range in width between 11' and 11'3" on 47'6"-deep lots and 132-134 are each 14' deep on a 52'4"-deep lot. Each house is two small rooms deep with a one-story brick rear kitchen addition somewhat narrower than the house. The pitch of the gable roof is especially low, a characteristic of this particular type of two-story, gable-roofed alley house. The houses are constructed in running bond and were originally painted, but most of the facades are now covered with formstone. Each house has a simple brick corbelled cornice. Chimneys are located in the middle of the front and rear rooms and each house also has a chimney at the rear end of the kitchen addition.

At 102-114 first floor door and window openings have splayed brick lintels, but second story windows have no lintels. All windows are filled with replacement 1/1 sash. At 116-122 door and window openings have flat wood lintels and wood sills. No original doors survive and the row shows a mix of replacement door styles, all surmounted by a single light transom. The houses sit on low basements, lit by a single-light transom. The entrances are reached by two concrete or brick steps.

The houses are basically two rooms deep, with the front room being entered directly from the front door. The front and back rooms of the first floor are separated by a wide opening, with the tightly winding, narrow stairs set in the rear room, in the space between the partition wall and the fireplace. The one-story rear addition served as the kitchen, with its own cooking fireplace.

Specific dates c. 1850 - 1860

Builder/Architect

Prepare both a summary paragraph of significance and a general statement of history and support.

These houses are significant as being representative of a surviving group of extremely modest two-story, gable-roofed houses built in Fells Point in the 1850s to serve as inexpensive housing for the influx of newly arrived immigrant families seeking work in harbor-related activities or in the first small factories being built at this time. Most of these houses were held as rental property and most were located along narrow alley streets, or, as is the case here, along even narrower courts. In terms of design, the houses are basically the descendants of earlier Federal-style working class housing built in the early decades of the century, but without the usual dormer story of such houses. Because there is no dormer story the roof slope is much less steep in these later versions of the style. The houses are quite tiny, with two small rooms on each floor and a centrally located, tightly winding, narrow staircase.
